WORK EXPERIENCE

Software Engineer
INFOSTRETCH   Aug 2019 - Present

• Developed single-page web apps for the patient to learn about device setup, firmware information, therapy details, track progress, and therapy rating using react, redux, and bootstrap.
• Collaborated with other developers, designers, and stakeholders to deliver highly functional features.
• Oversee the project team on day-to-day operations of project deliverables and problem resolution. Coordinates with project managers on project assignments, estimations, and workflows.
• Created scalable architecture using advanced concepts like Role-based routing, lazy loading, error boundaries, redux-thunk, memorization, multiple environment setups using webpack.
• Led development team to refactor the code and written unit test for all features with total coverage is above 85% that improves user experience and reduces testing efforts.

Full-Stack Web Developer
SUDOKREW SOLUTION   Jan 2019 - Jul 2019

• Design, develop, implement, and debug solutions to the apps by using ExpressJS, React, Redux, NodeJS, Jest, Gatsby, Webpack, HTML, CSS, and JavaScript.
• Built RESTful APIs to serve client-side React and mobile applications.
• Collaborated with QA and developer to plan test strategies and write automatic end-to-end tests.
• Optimized sites for usability, search engine optimization, and accessibility.
